On May 26, 2018, a group of former Roblox moderators started a petition on change.org asking for Roblox to re-hire them after they were fired. The petition currently has over 8000 signatures and the former moderators were promised that they would be getting jobs back at Roblox if their petition reached 10,000 signatures.

ROBLOX is a company characterized by its community-based culture. This is reflected in its games, which are generally hosted on the website (as opposed to the product), and as a result, are built by users for users. The developers at ROBLOX have stated that they are completely open to third party development—the only restriction on what is considered acceptable and permissible is that all products must be compatible with ROBLOX's Terms of Service. Whether ROBLOX soft products will be accepted into the Steam platform is still unconfirmed.

In 2006, David Baszucki, an MIT graduate and former robotics engineer, teamed up with co-founder Erik Cassel to create a game for the iPhone. After using the iPhone prototype to showcase the technology at Apple's Worldwide Developers Conference in 2008, they partnered with Roblox Corporation to develop a new platform for their ideas. In April 2009 they founded Roblox Corporation to create games and developer tools on Roblox. Both were inspired by Lego and video games.

I really like Roblox because I get to make friends with other users on the Internet that are my age and play games with me. Another thing I like about it is that you can play different games and see which ones you like, so it's very fun to me. I also think that the game has helped me develop a lot of social skills because you can talk to your friends using voice chat or text chat. You can tell them how you're feeling, what's wrong, etc. It's a game where there are a lot of different people from all around the world and they all have their own story. Another reason why I love the game is that you can really make new friends and you can play with them offline.
