ROBLOX is also one of the first websites to allow users to play multiplayer games with each other using video chat (most notably Skype). Over the course of the game, players can interact and communicate with each other through 'conversations'. ROBLOX also used Skype for video chat in many of their games.Some unofficial ports of ROBLOX that are based on Build include Mac OS X, Xbox 360, iOS and Raspberry Pi. The Raspberry Pi port allows users to use a Kinect sensor or USB webcam. Mac OS X includes ROBLOX support built into the client and includes limited support for input from keyboards and mice using DirectInput, as well as support for NVIDIA 3D Vision.

On October 8, 2017, they released a video showing large amounts of bugs and glitches in the game Frostbite. These include several bugs that allow for players to place guns and kill other players in mere seconds. ROBLOX said on their blog that this was due to an "incorrectly prepared prize package" but later stated that it was an error during a new update of their "Prototype Editor", which was supposed to have fixed the issues, but evidently did not.

In July 2018, Roblox had allegedly banned several high-profile creators due to the fact they made violent games. Although Roblox claims users were banned "due to improper behaviour" nothing has been proven yet. The situation is occurring in many forums and websites. In July 2018, ROBLOX put out a statement saying that they did not ban any creators, but instead were involved in a legal dispute with the people who claimed to have been banned.[82] They later said that anyone who was banned for making offensive content was "part of an organized effort by bad actors to scam our users. We have no tolerance for this behavior and we're doing everything we can to protect our community."[83]
