In this review, I will go through all the pros and cons of playing roblox, as well as what makes some games better than others in terms of what they offer to their users. Friends. roblox is relatively popular due to it's vast user base, which can be accomplished through the group chat feature that is built in to the game. This feature allows users to communicate with each other, create groups and share things such as games, locations and others. It also allows users to see what their friends are up to in the game. The cross-platform ability of being able to play on tablet or phone means that roblox works very well on mobile devices as well as older computers that do not have much processing power or graphics prowess - whether you're playing on Android, windows 10 or a Mac running OSX.

I have always wondered why people enjoyed playing Roblox so much. I think it's because it's very similar to Minecraft in many ways; for one thing, the graphics are very childish which got me interested at first. Because the game is customizable, you can choose to look at the world through a little boy's eyes or that of an adult. I chose to be an adult for a time, but it was always hard to play because it would become so boring. But at some point when I was playing Roblox, my interest in it started to fade away. The reason for this is because of the new updates they made to Roblox. Now there are so many advertisements everywhere and so many games being added every day. You never play with friends because everyone has their own account and their own games they are playing. Even if your friends are on, you have no idea who they are because they could just be anyone.
